PROFESSIONAL SUMMARY

Computer Science and Engineering student specializing in Data Analytics, Artificial Intelligence , and Dashboard Development. Experienced in building end-to-end data-driven applications using Python, SQL, and Streamlit. Analyzed datasets of 100K+ records to extract actionable insights. Skilled in data visualization, EDA, and backend development, with a strong focus on solving real-world problems.

SKILLS

- **Programming:** Python, SQL, R , Java
- **Data & Analytics:** Pandas, NumPy, Power BI, Tableau, Excel, Exploratory Data Analysis (EDA)
- **Web Development:** HTML, CSS, React.js, Node.js, Express.js
- **Databases:** MongoDB, MySQL
- **Tools & Technologies :** AWS, Git, GitHub, Postman, Streamlit

EDUCATION

Vellore Institute of Technology

2022 - 2027

Integrated M.Tech in Computer Science and Engineering (CGPA: 8.28)

Kanha Makhan Public School

10+2 (Intermediate)

PROJECTS

Airbnb Market Intelligence Dashboard | Python, Streamlit, Pandas

- Analyzed 100K+ Airbnb listings using Python, Pandas, and NumPy to identify pricing trends and demand patterns across multiple locations.
- Engineered 10+ interactive dashboards a using Streamlit and Plotly for market analysis and business reporting.
- Performed data cleaning and exploratory data analysis (EDA) on 100K+ records, improving dataset consistency and accuracy.
- Generated insights from 100K+ listing records to support pricing optimization and location-based market strategies.

DocuMind - AI Document Intelligence System | Python, Streamlit, FAISS , NLP

- Engineered a Retrieval-Augmented Generation (RAG) system capable of processing and querying 500+ PDF documents.
- Integrated FAISS vector indexing to enable semantic search across 500+ PDF documents with faster retrieval performance.
- Designed a Streamlit interface supporting real-time querying and instant response generation for 500+ documents.
- Converted 500+ unstructured PDF files into a searchable knowledge base, reducing manual lookup effort.

ReMedi - Medicine Reminder Web App | MERN Stack, JWT Authentication

- Architected a full-stack MERN application with JWT authentication supporting secure medicine tracking for 50+ user records.
- Designed CRUD workflows for scheduling, updating, and tracking 100+ medicine reminder records.
- Integrated browser-based real-time notifications and missed-dose tracking with support for 100+ scheduled reminders.
- Created a responsive React dashboard displaying daily and weekly medication adherence summaries and progress tracking.

CERTIFICATIONS

- Generative AI – Oracle (Professional), October 2025
- AI Foundations – Oracle, October 2025
- Applied Machine Learning in Python – Coursera, January 2026

ACHIEVEMENTS

- Completed certifications in Generative AI and Machine Learning.
