PROFESSIONAL SUMMARY

Computer Science & Engineering student (Integrated M.Tech, VIT) with hands-on experience building data-driven products and AI-powered applications. Passionate about solving real-world user problems through structured thinking and actionable insights. Built end-to-end tools analyzing 100K+ records to surface pricing trends and market patterns. Eager to contribute to product strategy, user research, and feature development at a data-first technology platform.

SKILLS

- **Product & Analytics:** User Research, Data-Driven Decision Making, KPI Tracking, Dashboard Design, EDA, Product Roadmapping
- **Programming:** Python, SQL, R, Java
- **Data & Analytics:** Pandas, NumPy, Power BI, Tableau, Excel, Exploratory Data Analysis (EDA)
- **Web Development:** HTML, CSS, React.js, Node.js, Express.js
- **Databases:** MongoDB, MySQL
- **Tools & Technologies :** AWS, Git, GitHub, Postman, Streamlit, Figma, Jira, Notion

EDUCATION

Vellore Institute of Technology 2022 - 2027
Integrated M.Tech in Computer Science and Engineering (CGPA: 8.28)

Kanha Makhan Public School
10+2 (Intermediate)

PROJECTS

Airbnb Market Intelligence Dashboard | Python, Streamlit, Pandas

- Analyzed 100K+ Airbnb listings across 5+ locations to identify pricing trends and demand patterns — translating raw data into actionable market intelligence.
- Defined dashboard requirements and built 10+ interactive Streamlit/Plotly dashboards, enabling non-technical stakeholders to explore market data 3x faster.
- Delivered location-based pricing recommendations by synthesizing listing data across 8+ market segments — supporting strategic investment decisions.

DocuMind - AI Document Intelligence System | Python, Streamlit, FAISS, NLP

- Identified the user problem of slow manual document lookup and defined product requirements for an AI-powered system processing 500+ PDFs in under 3 seconds per query.
- Led end-to-end development of a RAG-based system with semantic search across 500+ documents, reducing manual lookup effort by 70%.
- Converted 500+ unstructured PDFs into a structured knowledge base — cutting average information retrieval time from minutes to seconds.

ReMedi - Medicine Reminder Web App | MERN Stack, JWT Authentication

- Identified the user need for reliable medication tracking and scoped 5+ core features including scheduling, notifications, and adherence reporting.
- Shipped real-time browser notifications and missed-dose alerts for 100+ scheduled reminders — directly reducing medication non-adherence.
- Designed a responsive React dashboard surfacing daily and weekly adherence summaries across 50+ user accounts, improving medication habit tracking.

CERTIFICATIONS

- Generative AI – Oracle (Professional), October 2025
- AI Foundations – Oracle, October 2025
- Applied Machine Learning in Python – Coursera, January 2026

ACHIEVEMENTS

- Completed certifications in Generative AI and Machine Learning.
- Actively contributed to the Data Science Club at VIT by organizing and managing technical and recreational events, fostering a collaborative learning environment.
