PROFESSIONAL SUMMARY

Computer Science and Engineering student specializing in **Data Analytics, Artificial Intelligence , and Dashboard Development**. Experienced in building **end-to-end data-driven applications** using Python, SQL, and Streamlit. Analyzed datasets of **100K+ records** to extract actionable insights. Skilled in **data visualization, EDA, and backend development**, with a strong focus on solving real-world problems.

SKILLS

- **Programming:** Python, SQL, R , Java
- **Data & Analytics:** Pandas, NumPy, Power BI, Tableau, Excel, Exploratory Data Analysis (EDA)
- **Web Development:** HTML, CSS, React.js, Node.js, Express.js
- **Databases:** MongoDB, MySQL
- **Tools & Technologies :** AWS, Git, GitHub, Postman, Streamlit

EDUCATION

Vellore Institute of Technology

2022 – 2027

Integrated M.Tech in Computer Science and Engineering (CGPA: 8.28)

Kanha Makhan Public School

10+2 (Intermediate)

PROJECTS

Airbnb Market Intelligence Dashboard | Python, Streamlit, Pandas

- Built an interactive dashboard that analyzes **100K+ Airbnb listings** to identify pricing trends and demand patterns.
- Data cleaning and exploratory data analysis was performed using Python (Pandas and NumPy).
- Developed advanced visualizations including demand analysis, market share insights, and geographic distribution of listings.
- Generated actionable insights to support pricing strategy and location-based decision-making.

DocuMind - AI Document Intelligence System | Python, Streamlit, FAISS , NLP

- Developed a RAG based AI system for semantic search and question-resolving over PDF documents.
- Vector embeddings and FAISS implemented for fast, context-sensitive information retrieval.
- Built an interactive Streamlit interface for real-time document querying.
- Converted unstructured documents into a structured, searchable knowledge base for efficient insights.

ReMedi - Medicine Reminder Web App | MERN Stack, JWT Authentication

- Developed a full-stack MERN application with JWT-based authentication and secure user-specific data storage.
- Implemented CRUD operation items for drug scheduling, repeat logic, and dose tracking.
- Built a real-time reminder system using browser notifications, sound alerts, and missed-dose detection.
- Designed a responsive React dashboard that displays daily and weekly summaries and progress tracking.

CERTIFICATIONS

- Generative AI – Oracle (Professional), October 2025
- AI Foundations – Oracle, October 2025
- Applied Machine Learning in Python – Coursera, January 2026

ACHIEVEMENTS

- Built multiple end-to-end projects in Data Analytics and Full stack Development.
- Completed certifications in Generative AI and Machine Learning.
